- LOCATION: LONDON, SE1
- VALUE: £90,000
- FLOOR AREA: 285SQM
- DURATION: 2 WEEKS
- STAFF NO: 22

# COALITION

Coalition is a leading business intelligence provider firmly established as a premium brand in the investment and commercial banking markets. Coalition are a long standing customer of Office Profile and commissioned us to reconfigure and refurbish their existing office space to create a dynamic atmosphere.

The reconfigured office space consisted of an open plan area which was divided up with a combination of glass and solid partitioning. The glass partitioning featured manifestation to allow for privacy in the meetings rooms and for health and safety purposes. Our bench desking system was provided in the open plan office space along with meshed back task seating and personal storage solutions for the staff. StorageWalls were installed to deliver a bespoke storage solution that is modern, streamlined and customisable. Further work carried out by Office Profile included the flooring and decorating, installation of an air conditioning system and various electrical and data works.

Making your business space work harder

There was a tight timescale for the project, due to the Coalition staff having to work remotely for the duration of the refurbishment. The refurbishment was completed within just two weeks and the combination of the existing wooden beams, along with the new modern desking, gives the office space a striking and eye-catching appearance.
