Making your business space work harder

ICELANDAIR

Main office space showing the limed oak wood-effect vinyl flooring

Director's office with low StorageWall and sit-stand desking

# ICELANDAIR

Icelandair commissioned Office Profile to redesign and fit out their London office in an efficient layout with a colour scheme that complemented their corporate branding.

In the two office spaces, the chosen flooring was limed oak wood-effect vinyl which was contrasted by supplying white desks and StorageWall. Pops of colour were introduced into the office with blue operator chairs. We supplied sit-stand desking for the staff along with mobile pedestals.

In the Director's office, we installed a low StorageWall to provide a space efficient and modern storage solution, along with a circular table for informal meetings paired with white leather operator chairs for a sleek and professional feel.

Icelandair were keen to follow their corporate branding and colours, so we applied a vinyl graphic of the Seljalandsfoss waterfall to their StorageWall in the corridor, and fitted a white composite material Icelandair sign, illuminated by LED's.

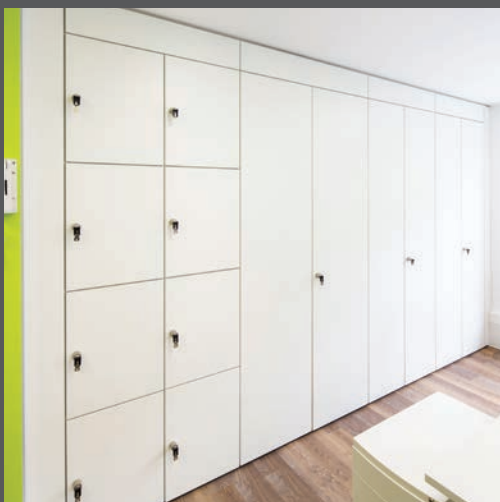

A vinyl graphic of the Seljalandsfoss waterfall applied to the corridor StorageWall

- LOCATION: FITZROVIA, LONDON
- VALUE: £130,000
- FLOOR AREA: 300 SQM
- DURATION: 8 WEEKS
- STAFF NO: 20

Bespoke storage wall in the sub-let office

Sit-stand desking in use in the main office area

We completely transformed the kitchen area from the previous smaller space into a light, spacious and colourful kitchen. We installed gloss white cupboards and laid colourful blue vinyl floor tiles which matched the blue walls and we also supplied tables with coordinated benches.

Finally, we created and fitted out a shower room and created two large meeting room areas with folding walls.
