

Case Study: Financial Firm

Financial Firm approached Office Profile with a brief of creating a funky “New York Loft Style” office space to suit a dynamic team of 60 staff.

The Directors wanted Financial Firm office to be one of the best places to work in Brighton, with amazing perks such as fresh daily catering for all staff, cool and welcoming offices and even free haircuts right there in the office! Financial Firm was relocating to a uniquely shaped building which had long narrow office wings. The Design Team opted to maintain them as pure office space due to the clients wish to bring the teams together from different offices into one space. The client required 4 semi open plan areas for each of their project teams and technical departments. To get around the offices, the staff glide down the length of the space on scooters and hover boards!
